# COVID-19 Attacks the Lungs

## Flavored Products Put Our Kids at Risk

The harmful impact of smoking on the lungs is well documented—and there is growing evidence that e-cigarettes can harm lung health. The coronavirus attacks the lungs. That's why **health experts warn that people who smoke or vape are at greater risk for serious complications from COVID-19.**

**One in four Chicago high school students used e-cigarettes in the past 30 days.** In fact, youth e-cigarette use has skyrocketed 135% in the last two years alone.

Meanwhile, tobacco companies continue to aggressively market menthol-flavored cigarettes to kids, African Americans, and other targeted groups. Young smokers are more likely to use menthol cigarettes than any other age group.

**It's time to take action.** Visit [FlavorsHookKidsChicago.org](https://FlavorsHookKidsChicago.org) and let your local alderman know that they should ban the sale of flavored vape and tobacco products.

**Protect Our Kids.**  
**Get Rid of the Flavors.**
